SEO Changelog — Privacy Policy

URL: https://bikkinibottomboat.com/privacy-policy/ · **WP ID:** 1660 (Elementor; text pasted from Google Docs) · **Last modified:** 2025-03-03 · **Audit date:** 2026-10-25 · **Audit page 23 of 24**
Sources: WordPress content and Rank Math fields (site connector); plugin list from site_info.

> **Not legal advice.** This changelog covers SEO, accuracy against what the site actually runs, and formatting. Have the final policy text reviewed by the owner's attorney or a reputable policy generator.

> **Brand finding:** the policy names the legal entity **Beach Please Charters LLC**. That explains the "Beach Please Charters" mentions in the homepage meta, image alts and keyword fields. Use it **only as the legal name**: add `"legalName": "Beach Please Charters LLC"` to the LocalBusiness schema (homepage changelog §7a). Keep "Bikkini Bottom Boat Charters" as the customer-facing brand in titles, meta and alts.

1. Summary

Area	Current state	Priority
Doesn't match the site	It's a generic template. It mentions **user Accounts** (the site has none) and the **DoubleClick DART cookie** (retired years ago). It doesn't mention the tools the site actually uses or should use: **FareHarbor** (bookings and payments), **WPForms** (contact form), **Google Analytics / Tag Manager**, Google Ads / Meta Pixel (if added), **Google Maps** and **YouTube** embeds, the Google reviews widget, and LiteSpeed/Hostinger hosting.	**High**
Dead references	"Privacy Policy Links" and "What Are Cookies?" are plain text left over from the template (they were links in the original).	**Medium**
Contact email	Lists `beachpleasecharters@gmail.com`; the footer and Contact page use `res4bikkinibottom@gmail.com`. Pick one for privacy requests.	**Medium**
No effective date	No "Last updated" date.	**Medium**
Headings / formatting	H1 "Privacy Policy", then two H2s saying "Privacy Policy for Beach Please Charters LLC...". Section titles (Consent, Information we collect, Log Files, CCPA, GDPR...) are **plain paragraphs**, while only 2 subsections are H3. Every element carries Google Docs inline styles (negative margins, `padding:-6pt`, white backgrounds), which can break dark mode and mobile layout.	**Medium**
Rank Math	Focus keyword field stuffed with 5 phrases including "crab island tours". Meta "Privacy Policy details found here." is generic.	**Low**

2. Rank Math / indexing

Field	Current	Change to
SEO title	Bikkini Bottom Boat Charters Privacy Policy	Keep
Meta description	Bikkini Bottom Boat Charters Privacy Policy details found here.	**How Bikkini Bottom Boat Charters (Beach Please Charters LLC) collects, uses and protects your information when you visit our site or book a tour.**
Focus keyword	5 phrases incl. "crab island tours"	**Clear it** (no ranking target for a legal page)
Robots	index (VERIFY)	Either is fine. Recommended: **index, follow** (a visible privacy policy is a trust signal), but exclude it from Internal Link Juicer so no keyword links get inserted into it.
WordPress setting	—	Settings → Privacy: set this page as the Privacy Policy page so WP and plugins (WPForms, consent tools) can reference it.

3. New structure

Tag	Heading
H1	Privacy Policy
(text)	"Bikkini Bottom Boat Charters is operated by Beach Please Charters LLC, 530 Harbor Blvd, Destin, FL 32541. Last updated: [date]."
H2	Information We Collect (H3: Information you give us · Booking and payment information · Information collected automatically)
H2	How We Use Your Information
H2	Bookings and Payments (FareHarbor)
H2	Cookies, Analytics and Advertising (H3: Google Analytics & Tag Manager · Advertising pixels [if used] · Embedded content: Google Maps, YouTube, reviews widget)
H2	How We Share Information (service providers, legal, no sale of personal data)
H2	Data Retention and Security
H2	Your Choices and Rights (opt-out links; state rights where applicable; GDPR section only if serving EU visitors)
H2	Children's Information
H2	Changes to This Policy
H2	Contact Us (one email, phone, address)

4. Content fixes (accuracy)

Current text	Change
"When you register for an Account..."	Remove (no accounts). Replace with: "When you book a tour, our booking provider FareHarbor collects your name, email, phone and payment details to process your reservation. See FareHarbor's privacy policy."
DoubleClick DART Cookie section	Remove. Replace with a current "Google Analytics" paragraph and an opt-out link (Google Analytics opt-out browser add-on), plus Google Ads / Meta Pixel paragraphs if those tags are installed (see the homepage tracking plan).
"Our advertising partners are listed below... Google"	Rewrite as "Third-party services we use" with each provider and its privacy link: FareHarbor, Google (Analytics, Maps, YouTube), Meta (if pixel), WPForms/WordPress, Hostinger.
"Privacy Policy Links" / "What Are Cookies?"	Remove the dead references or link them properly.
Contact form	Add: "Messages sent through our contact form are emailed to us and are not stored on our website." (WPForms Lite doesn't store entries; VERIFY.)
CCPA / GDPR sections	Keep only what applies, per legal review. Don't promise "one month" response times or fees unless they're actually honored.
Email	Use the single address chosen in §1.

5. Technical

Issue	Fix	Priority
Inline Google Docs styles	Paste the new text as plain text (Ctrl+Shift+V) into an Elementor Text Editor / Gutenberg blocks. Remove all `style=""` attributes, negative margins and duplicate H2s.	**Medium**
Consent banner	If GA4 advertising features, Google Ads or the Meta Pixel are enabled, add a lightweight consent banner (e.g. Complianz or CookieYes) with Google Consent Mode v2, and link this policy from it.	**Medium**
Links to the policy	Footer (exists). Add it to the WPForms contact and group inquiry forms ("By submitting you agree to our Privacy Policy") and to the cookie banner.	**Medium**
Terms page	Consider a short "Booking Terms" page (or link FareHarbor's terms) alongside the new Weather & Cancellation Policy (changelog 22).	**Low**

6. Tracking

None needed on this page beyond default pageviews. Make sure tracking tags respect consent choices once a banner is installed (GTM consent checks on GA4, Ads and Meta tags).

7. Changelog (implementation checklist)

#	Change	Where	Status
1	Rewrite to reflect real tools (FareHarbor, WPForms, GA4/GTM, Maps, YouTube, reviews, ads pixels if any); remove Accounts and DART text	Page 1660	To do
2	Legal review of the final text	Owner / attorney	Waiting
3	New H1/H2/H3 structure; inline styles stripped; "Last updated" date	Elementor	To do
4	Single privacy contact email	Page / footer	To do
5	Rank Math: meta updated, focus keyword cleared; ILJ exclusion	Rank Math / ILJ	To do
6	Set as WP Privacy Policy page; link from forms	Settings / WPForms	To do
7	Consent banner + Consent Mode v2 (if ad/remarketing tags used)	Plugin / GTM	To do
8	`legalName: Beach Please Charters LLC` added to LocalBusiness schema	Rank Math (homepage)	To do

Next page in queue: **Elementor #2321** (/elementor-2321/, ID 2321), the last page and a cleanup item.
