SEO Changelog — Post: Hurricane Isaias in Destin

URL: https://bikkinibottomboat.com/hurricane-isaias-destin-safety-updates/ · **WP ID:** 2568 (post, classic HTML; author ID 6; featured image 2571) · **Published:** 2026-10-08 · **Audit date:** 2026-10-25 · **Audit page 22 of 24**
Sources: WordPress content and Rank Math fields (site connector).

1. Summary

Area	Current state	Priority
Well built	The best-structured post on the site: clear H2/H3 hierarchy, about 900 words, a real first-hand story (Captain Daniel moving the boat to Panama City for haul-out), and 10 authoritative outbound links (NHC, NWS, Okaloosa EOC, FWC). Rank Math title, meta and focus keyword are all filled.	—
Out of date	Written as "Isaias **is approaching**" on Oct 8, and it hasn't been updated since. Seventeen days later, visitors (and Google) can't tell whether Bikkini Bottom is running tours, damaged or closed. A post-storm update is the most important change, because it reassures anyone booking for the coming weeks.	**High**
Duplicate H1	The content starts with its own `<h1>` that repeats the post title, which the theme already outputs as H1. Two H1s.	**Medium**
No internal links	Zero links to Bikkini Bottom pages. No "back on the water, book here", no weather/cancellation policy link, no link to the Safety page.	**High**
HTML	Two stray closing `</p>` tags (after the "Avoid Beaches" and "resources" sections), an image wrapped in `<p>` with tab whitespace, and an empty Gutenberg paragraph at the end.	**Low**
Evergreen gap	Hurricane news ages fast. The lasting search need is **"what happens to my boat tour if a storm hits"**. The site has no weather/cancellation policy page, and changelogs 2, 3, 5 and 12 all have a [weather policy] placeholder.	**Medium**

2. Rank Math / meta

Field	Current	Change
SEO title	Hurricane Isaias in Destin FL | Safety & Local Updates	After the update: **Hurricane Isaias in Destin FL: Update & Safety Resources**
Meta description	...how Captain Daniel is preparing for Hurricane Isaias...	After the update: **Update [date]: Bikkini Bottom is back on the water after Hurricane Isaias. How we prepared, plus Destin storm safety tips and official resources.** (adjust to the real status)
Focus keyword	Hurricane Isaias Destin FL	Keep
Category	Blog	**Events, Fireworks & Weather**

Author	User ID 6	VERIFY the author's display name and bio. Ideally "Captain Daniel" with a short bio, which supports E-E-A-T on safety content.

3. Headings

Tag	Current	New
H1 (in content)	Hurricane Isaias in Destin: Staying Safe and Preparing for the Storm	**Remove** (the theme's post title is the H1)
H2 (new, top)	—	**Update [date]: [We're Back on the Water / Status]**
H2 ×4	Captain Daniel… / Preparation Tips… / Trusted Local Websites… / Looking Out…	Keep
H3 ×4	Evacuation Plan / Home & Property / Supplies / Avoid Beaches	Keep
H2 (new)	—	**What Happens to Your Tour If Weather Hits?** (short, links to the policy)

4. Content additions

H2 Update [Month Day]: [We're Back on the Water]

[Owner: e.g. "Hurricane Isaias has passed. Bikkini Bottom rode out the storm safely on dry land in Panama City, and Captain Daniel brought her home on [date]. We're running Crab Island tours, sunset dolphin cruises and private charters again on our normal schedule. Thank you to everyone who checked on us!"]

[Book Your Next Trip]

H2 What Happens to Your Tour If Weather Hits?

Your safety comes first. If our captain cancels a trip for weather, [owner policy: e.g. "you can reschedule for free or get a full refund"]. We watch the forecast closely and will contact you before your departure. See our FAQs or read is Crab Island safe for families for more on how we handle conditions on the water.

5. Links

Link	Change
New internal (4–5)	/crab-island-tours-in-destin-fl/ · /destin-sunset-dolphin-cruise/ · /faqs/ (#booking) · /is-crab-island-safe-for-families/ · contact page

Outbound (10)	Keep; they're authoritative. Set them to open in a new tab. Check yearly that they still resolve (county URLs change).
Inbound	From the Safety page "Afternoon storms" H3 and the FAQ weather answer (until a dedicated policy page exists).

6. Technical

Issue	Fix	Priority
Duplicate H1	Delete the in-content `<h1>`.	**Medium**
Stray tags	Remove the 2 orphan `</p>` and the empty paragraph. Convert to blocks (Gutenberg "Convert to blocks") so future edits stay clean.	**Low**
Image	IMG_0103 alt "preparing for Hurricane Isaias" → **"Captain Daniel preparing the Bikkini Bottom charter boat for Hurricane Isaias haul-out"** (describe the actual photo). Featured image 2571: check its alt.	**Low**
Dates	When the update is added, Rank Math will output a new `dateModified`. Also show "Updated [date]" visibly under the title.	**Medium**
Schema	Keep BlogPosting. Optionally **NewsArticle** while it's current. No SpecialAnnouncement unless it's a closure notice.	**Low**
Site-wide banner	During future storms, add a dismissible site-wide notice bar (Elementor Pro popup/bar) linking to the update post, so visitors on every page see the operating status.	**Medium**

7. Recommended new page: Weather & Cancellation Policy

Element	Spec
URL	/weather-cancellation-policy/
H1	Weather & Cancellation Policy
Sections	Who decides (captain) · Rain vs lightning vs wind · Refund/reschedule rules · Hurricane season (June–November) · How we contact you · Guest cancellations
Links from	Footer (About Us column), FareHarbor booking confirmation, FAQ, every service page FAQ, this post
Why	It fills the [weather policy] placeholders in changelogs 2, 3, 5, 9, 12 and 15, reduces booking hesitation, and gives Google one clear answer.

8. Tracking

Item	Setup
Storm traffic	GSC: impressions for "hurricane isaias destin" and similar. GA4: sessions to this post and onward clicks to booking after the update.

Outbound resource clicks	Enhanced measurement outbound clicks. These show which official resources people use.
Booking after update	`begin_checkout` with `link_location` = storm_update.

9. Changelog (implementation checklist)

#	Change	Where	Status
1	**Post-storm "Update [date]" section at the top + Book CTA**; title/meta updated to match	Post / Rank Math	To do (urgent)
2	In-content H1 removed; stray tags cleaned; converted to blocks	Editor	To do
3	"What Happens to Your Tour If Weather Hits?" H2 + 4–5 internal links	Editor	To do
4	Image alts; visible "Updated" date; author name/bio	Media / Users	To do
5	Category → Events, Fireworks & Weather	Post	To do
6	New Weather & Cancellation Policy page; linked site-wide	New page	To do
7	Storm notice-bar process for future storms	Elementor Pro	To do
8	Owner: current operating status and return date; weather/cancellation policy wording	Owner	Waiting

Next page in queue: **Privacy Policy** (ID 1660).
