SEO Audit & Changelog: Clients

URL: **https://rockstar-marketing.com/clients/** · WP ID 4015 · Builder: WPBakery (full_width template) · SEO plugin: All in One SEO
Audit date: 2026-10-25 · Last modified in WP: 2022-09-13 · Page 9 of 33 in the site queue

Summary. Every page we've rewritten so far links here as proof ("see our clients"). Right now the page is **a 25-image gallery with zero words**: no heading in the content, no client names, no results, no testimonials. The image files are named "jh", "aaaa", "sssss", "2323", "343434" and "7676", so Google can't tell what (or who) is in them. Each image also has its own **indexable attachment page** (e.g. `/jh-3/`, `/clients/sssss/`, `/clients/attachment/7676/`), which are thin pages that waste crawl budget. The fix: turn the page into a **Clients & Results** page (named logos, 3–5 short case studies, testimonials) and redirect attachment pages site-wide.

Method note: the live site can't be reached from the audit environment. Data comes from WordPress (connector) and AIOSEO. The connector doesn't expose image alt text. Given the file titles, assume alt text is empty and *verify in the Media Library*.

1. Priority Fix List

#	Priority	Area	Issue → Fix
1	P1	No content	0 words of text. Add an intro, client categories, 3–5 case studies, testimonials and a CTA (about 700 words, §5).
2	P1	H1	No heading in the content; the theme title "Clients" is the only probable H1 (*verify*). Set the H1 to **"Our Clients & Results"**.
3	P1	Attachment pages	Each gallery image has a public attachment URL (/jh-3/, /clients/aaaa/ ...). In AIOSEO → Search Appearance → Image SEO / Media, turn on **"Redirect attachment URLs → attachment file/parent"** and set Attachments to noindex. This is a site-wide fix, covering every image on the site.
4	P1	Image names & alt	Rename the media titles and add alt text for all 25 images: "[Client name] logo" or "[Artist] – social media client". Where you can't name a client, use a category (e.g. "Grammy-winning country band – Rockstar Marketing client").
5	P1	Meta	SEO title "#post_title #separator_sa #site_title" renders as "Clients – Destin, Florida Advanced Social Media and SEO Company". Description is the site-wide duplicate. New values in §2.
6	P2	Case studies	Add 3–5 mini case studies (client type → challenge → what we did → result). These become the proof that every other page links to. Use real numbers only.
7	P2	Testimonials	Add 3–6 testimonials with name, business and city (from Google reviews, with permission).
8	P2	Intralinking	0 links. Link each case study to the service used (SEO, social, video, web) and the matching city page, and add a CTA to /contact-us/.
9	P2	Gallery weight	25 images at 350×350 load all at once. Lazy-load them, use WebP, and consider fewer (12–15 strongest logos) on a uniform background.

10	P3	Builder junk	2 raw-HTML spacers. The separator icon (hand-sm, 11730) is decorative; give it alt="".
11	P3	Portfolio post type	One `portfolio_page` item exists (Mikado). Either build the case studies as portfolio items linked from here, or noindex the portfolio type. Decide when we reach it in the queue.

2. Meta Tags & Search Appearance (AIOSEO)

Field	Current	New

Media Library clean-up (gallery images)

Media IDs	Current title	Action
11692, 11693, 11683, 11691, 11689, 11684, 11680, 11694, 11825, 11837, 11677, 11682, 11827, 11833, 11686, 11688, 11678, 11676, 11674, 11673, 11824, 11690, 11835, 11834, 11830	e.g. "jh", "aaaa", "sssss", "343434", "7676", "2323"	Title + alt = "[Client name] logo". Rename future uploads before uploading (e.g. `client-name-logo.webp`).
11730 (separator icon)	hand-sm	alt="" (decorative)

6. Tracking & Measurement

Priority	Item	Action
P1	CTA + phone	`cta_click` (clients_bottom), `phone_call_click`.
P2	Proof-page assist	GA4 exploration: share of leads whose session included /clients/. If it's high, link here more prominently from service pages.
P2	Case study clicks	`case_study_click` with the case name, on "read more" or service links inside case studies.
P3	Scroll	Check that 90% scroll is reached. If not, move the testimonials higher.

7. Technical SEO

Priority	Item	Finding / Action
P1	Attachment URLs (site-wide)	Redirect attachment pages to the file or parent page (AIOSEO setting), and check that the sitemap has no attachment URLs. Afterwards, request removal of indexed ones in GSC if any show in `site:rockstar-marketing.com/clients/`.
P2	Images	Convert to WebP, keep 350×350 crops, lazy-load everything below the first row, and set explicit width/height.
P2	Schema	`CollectionPage` + `Review` items only if the testimonials are genuine. Don't add AggregateRating for your own business on your own site (Google ignores self-serving review stars).
P3	Builder junk	Remove 2 raw-HTML spacers.
