SEO Audit & Changelog: Miramar Beach Social Media Company

URL: **https://rockstar-marketing.com/miramar-beach-social-media-company/** · WP ID 11955 · Builder: Classic editor · SEO plugin: All in One SEO
Audit date: 2026-10-25 · Created 2022-08-29 · Modified 2022-09-13 · Page 24 of 33 in the site queue

Summary. Miramar Beach search demand is tiny. Semrush shows 0–10 searches/mo each for "miramar beach seo", "web design", "digital marketing" and "social media", and 0 for "sandestin marketing". Separate Miramar pages for each service would be thin, so the best use of this URL is **one combined page: "Miramar Beach & Sandestin Digital Marketing"** (social media first, plus SEO and web design). Miramar Beach is the only city on the site with no SEO or web design page. Your Destin office is only a few miles away, which also makes Miramar Beach the one city outside Destin where you can realistically appear in the **map pack**.

Content problems: the two paragraphs are wrapped in `<span data-slate-fragment="…">` attributes containing about 3KB of base64-encoded text each (pasted from a rich-text editor). Decoded, the hidden text says "Unlike other firms in **Destin**", so it was copied from the Destin page. The visible copy is rambling and first-person ("I mean, maybe still seems a little crazy... we can say confidently, decisive!"), with "Miramar Beaches Best" (no apostrophe, unproven claim). The meta description is empty, the image is the shared stock photo at full 847px over http:// with alt="", and the bulleted platform list includes Reddit and Twitter. One thing is good: the only internal link goes correctly to /social-media/.

Method note: the live site can't be reached from the audit environment. Data comes from WordPress (connector), AIOSEO and Semrush US. *Verify live* = check in the browser.

1. Priority Fix List

#	Priority	Area	Issue → Fix
1	P1	Hidden base64 blobs	Remove both `data-slate-fragment` attributes (about 6KB of encoded text copied from the Destin page). Edit in the Text/Code view and remove the `<span …>` wrappers entirely.
2	P1	Unprofessional copy	"I mean, maybe still seems a little crazy", "decisive!", "chaos online". Full rewrite (§5).
3	P1	Scope	Widen to **"Miramar Beach & Sandestin Digital Marketing"** (social + SEO + web design + video). Keep the slug (it's linked from 6 rewrites as "Miramar Beach social media").
4	P1	Meta description	Empty. Add it (§2). The title also uses the "-" separator template, unlike most pages (see SRW-06).
5	P1	Duplicate H1	Content H1 + theme title (*verify*).

6	P2	Map pack potential	Miramar Beach is next door to the Destin office. Make sure your GBP service area includes Miramar Beach, Sandestin and Seascape, and mention Miramar landmarks in the copy (§5).
7	P2	Image	`182142720_s.jpg` full size (847×565), http://, alt="", also used on 4 other pages. Replace with a unique local image (WebP, about 800px, alt text).
8	P2	Unproven claim	"Miramar Beaches Best Social Media Company" → remove it and use proof points.
9	P2	No CTA / NAP / map	Add them. A map is useful here, since the office is nearby.
10	P3	Platform list	"X Social Media Marketing" ×7. Replace with short platform descriptions; drop Reddit unless you offer it.

`<h2>` **Marketing for Resorts, Restaurants & Shops on Scenic 98**
`<p>` Miramar Beach runs on visitors: resort guests at Sandestin, shoppers at Grand Boulevard and Silver Sands, families in beachfront condos along Scenic Gulf Drive. Most of them decide where to eat, shop and play on their phones, often after seeing a post or a review. Year-round residents matter too, especially for service businesses. We build campaigns for both, timed to the seasons.

6. Tracking & Measurement

Priority	Item	Action
P1	Leads	city=miramar → `generate_lead`; `cta_click`, `phone_call_click`, `directions_click`.
P2	GBP	Check GBP Insights for searches from Miramar Beach (the map pack is winnable here). Add Miramar Beach to your GBP service areas.
P3	GSC	Regex `miramar|sandestin`. Low volume, so review it quarterly.

7. Technical SEO

Priority	Item	Finding / Action
P1	data-slate-fragment	Remove ~6KB of hidden base64 attribute data (adds HTML weight and contains a duplicate copy of the Destin text).
P1	Single H1	Content H1 or theme title.
P2	Schema	`Service` (Social Media Marketing + Digital Marketing, areaServed [Miramar Beach, Sandestin]) + `BreadcrumbList`.
P2	Image	https, WebP, unique, alt text, about 800px.
P3	Site-wide scan	Search all content for `data-slate-fragment` and `data-start=` (ChatGPT residue was also found on the FAQ) and strip them.
