SEO Audit & Changelog: Contact Us

URL: **https://rockstar-marketing.com/contact-us/** · WP ID 11576 · Builder: WPBakery + Quform (form id 1) · SEO plugin: All in One SEO
Audit date: 2026-10-25 · Last modified in WP: 2024-02-12 · Page 8 of 33 in the site queue

Summary. This is the site's **conversion page**. Every CTA in the previous 7 audits points here, so measurement matters more on this page than anywhere else. It's in decent shape: form, NAP, hours, email and map are all present. The problems are mainly conversion and technical. Neither phone number is click-to-call, the email address is exposed as plain text, the map iframe is fixed at 1100px wide (it overflows on mobile) and isn't lazy-loaded, there are probably two H1s, the meta description is the duplicate used site-wide, and there is **no thank-you page** to measure leads. There's no reassurance copy either (what happens after I submit? how fast will you reply?).

New NAP data found here: second phone **(855) 545-3669** (toll-free), email **info@rockstar-marketing.com**, hours **Mon–Fri 9am–5pm, Sat by phone, Sun closed**. Use them in schema site-wide.

Method note: the live site can't be reached from the audit environment. Data comes from WordPress (connector) and AIOSEO. *Verify live* = check in the browser.

1. Priority Fix List

#	Priority	Area	Issue → Fix
1	P1	Lead tracking	Quform id 1 has no thank-you page. Create `/thank-you/` (noindex) and set Quform 1 → Confirmation → Redirect to it. Fire `generate_lead` there. Without this, no lead in GA4 or Google Ads can be attributed.
2	P1	Click-to-call	Both numbers are plain text: "1-(850)-542-3091" and "1-(855)-545-3669". Make them `<a href="tel:+18505423091">(850) 542-3091</a>` and `tel:+18555453669`. Most mobile visitors call rather than fill in a form.
3	P1	Map breaks mobile	The iframe is `width="1100" height="450"` inside a 2/3 column, so it causes horizontal scroll on phones. Use `width="100%"`, a responsive wrapper, `loading="lazy"` and `title="Map to Rockstar Marketing, Destin FL"`. The empty 1/3 column next to it can be removed.
4	P1	Duplicate H1	The content H1 "Contact Us" plus the theme title "Contact us" (*verify live*). Keep one: **"Contact Rockstar Marketing"**.
5	P1	Meta tags	SEO title empty; description duplicated with Home, Clients and About. New values in §2.
6	P2	Reassurance copy	Add 2–3 lines above the form: what happens next, reply time ("within 1 business day", a promise already made on the Services page), and that the audit is free with no obligation.

7	P2	Form fields	Recommended fields: Name, Email, Phone, Business/Website, **Service interested in** (dropdown: SEO / Social / Video / Web Design / PPC / Not sure), Message. Optional: Budget, How did you hear about us. The service dropdown feeds the `service` parameter in tracking. *Verify the current fields live.*
8	P2	Email exposure	Plain-text info@rockstar-marketing.com gets scraped by spam bots. Use a `mailto:` link with simple obfuscation (or keep the form only) and fire `email_click` on it.
9	P2	Schema	`ContactPage` + the Organization/ProfessionalService entity, with both telephones, email, `openingHoursSpecification` (Mon–Fri 09:00–17:00) and a `contactPoint` (contactType "sales").
10	P2	Sidebar heading	"Rockstar Marketing" as an H2 is fine, but rename it "Visit or Call Us" for clarity, and add an "Office Hours" H3.
11	P3	Emoji bullets	📍📞📩🕘 render inconsistently and screen readers announce them ("round pushpin"). Wrap them in `<span aria-hidden="true">` or use icon fonts. Mark up hours as a list or table.
12	P3	Internal links	0 links. Add a short "Not ready to talk? Explore our services" row with links to the 4 service pages and /faq/.
13	P3	Trust	Add a single testimonial or a Google rating snippet ("★ 4.9 from [N] Google reviews") beside the form. *Use your real rating.*

2. Meta Tags & Search Appearance (AIOSEO)

6. Tracking & Measurement

Priority	Item	Action
P1	generate_lead	Fire on /thank-you/ page view (GTM trigger: Page Path equals /thank-you/), with parameters `form_id=1`, `service` (from the dropdown, passed as a query string, e.g. `/thank-you/?service=seo`) and `lead_source_page` (referrer). Mark it as a Key Event.
P1	phone_call_click	Both tel: links, with parameter `phone_line` (main / tollfree). Mark it as a Key Event.
P1	Google Ads conversions	Import `generate_lead` and `phone_call_click` from GA4 into Google Ads. Add a Google Ads call conversion for calls from ads.
P2	Meta Pixel / CAPI	Fire `Lead` on /thank-you/ and `Contact` on tel:/mailto: clicks.
P2	Form abandonment	Fire `form_start` (Enhanced Measurement does this automatically) and compare it with generate_lead to get the form completion rate. If it's under 30%, cut fields.
P2	email_click, directions_click	Secondary engagement events. Don't mark them as Key Events.
P3	CRM / lead log	Send Quform submissions to a sheet or CRM (Quform → webhook / Zapier) with UTM fields captured in hidden inputs, so each lead carries its source.

7. Technical SEO

Priority	Item	Finding / Action
P1	Responsive map	Fixed 1100px iframe → 100% width, aspect-ratio wrapper, loading="lazy", title. Or replace it with a static map image linked to Google Maps (faster LCP).
P1	Form deliverability	Send a test submission. Check that the notification reaches info@, that SMTP is authenticated (not PHP mail), that spam protection is on (Quform honeypot + reCAPTCHA v3 or Turnstile), and that the redirect to /thank-you/ fires. *Verify live.*

P2	ContactPage schema	`ContactPage` → about: Organization @id; Organization gets telephone ["+1-850-542-3091","+1-855-545-3669"], email, openingHoursSpecification and contactPoint.
P2	NAP consistency	Check that the Google Business Profile shows exactly "385 Harbor Blvd Suite 200, Destin, FL 32541" and (850) 542-3091 as primary. Record the toll-free number as an additional phone only.
P3	Empty column	Delete the empty 1/3 column in the map row (or put "Get directions" + parking info there).
P3	Accessibility	Form labels visible (not placeholder-only), error messages announced, emoji aria-hidden.
