SEO Audit & Changelog: Privacy Policy

URL: **https://rockstar-marketing.com/privacy-policy/** · WP ID 11909 · Builder: Classic editor · SEO plugin: All in One SEO
Audit date: 2026-10-25 · Created / last modified: 2018-09-11 · Page 27 in the site queue

Summary. This page has little SEO value, but it's a **blocker for the tracking plan** in every previous audit. It's a generic 2018 template (about 300 words) that says **"Data is never given to advertisers"** and that it is "not a legally binding contract". The recommended Meta Pixel/CAPI, Google Ads conversion import, remarketing audiences, GA4 Enhanced Measurement, call tracking and Quform-to-CRM sync all share data with advertising platforms. Google Ads and Meta both require advertisers to disclose this in a privacy policy. **Update this page before turning those on.** It also doesn't mention cookies, forms, phone or SMS, the Google Maps and YouTube embeds, or how to request deletion, and its section labels are plain text rather than headings.

Not legal advice. The draft in §5 is a plain-language starting point that reflects the tools recommended in this audit. Have an attorney review it (especially if you text leads, serve EU/UK visitors, or process client data on clients' behalf).

Method note: data comes from WordPress (connector) and AIOSEO; the live site couldn't be reached. Which tools are actually installed must be *verified live* before publishing.

1. Priority Fix List

#	Priority	Area	Issue → Fix
1	P1	Conflicts with the tracking plan	"Data is never given to advertisers" must change before Meta Pixel, Google Ads remarketing or conversion import go live. Disclose the advertising and analytics partners (§5).
2	P1	Missing disclosures	Add: cookies and similar tech, the forms you collect (Quform 1/2/3), phone calls and call tracking, SMS (if used), embedded content (Google Maps, YouTube), how long you keep data, user choices (opt-out links), contact and deletion requests, children, and changes to the policy.
3	P1	Effective date	No date shown; last edited 2018. Add "Last updated: [date]".
4	P2	Headings	"Usage", "Duration", "Commerce", etc. are plain lines, not headings. Use an H2 per section (§3).
5	P2	"Contact Us" not linked	Link to /contact-us/ and add the email and postal address.
6	P2	Discoverability	Link the policy in the footer (*verify*) and under every form ("By submitting, you agree to our Privacy Policy"). Required for Google Ads lead forms and good practice for Quform.
7	P2	"Indefinitely" retention	"The data obtained may be kept indefinitely" is a red flag for users. State real retention periods (e.g. lead data for [X] years, analytics per GA4's retention setting).

8	P3	Consent banner	If you run remarketing or serve EU/UK visitors, add a cookie banner with Google Consent Mode v2 (see Home H-18) and describe it in the policy.
9	P3	WordPress privacy setting	Settings → Privacy → set this page as the Privacy Policy page (WordPress links it from the login page and comment forms).
